

MOVING OBJECT ASSESSMENT SYSTEM AND METHOD

Abstract of the Invention

5 A method and system for use in monitoring a search area includes
the provision of object path data representative of at least one object path of
one or more moving objects in the search area. Defined normal and/or
abnormal object path feature models are provided based on one or more
characteristics associated with normal or abnormal object paths of moving
10 objects in the search area. The feature models may be based on a
clustering process. The object path data is compared to the one or more
defined normal and/or abnormal object path feature models for use in
determining whether the object path is normal or abnormal.

CERTIFICATE UNDER 37 CFR §1.10:

"Express Mail" mailing label number. EL 888274065 US

Date of Deposit: December 27, 2001

I hereby certify that this paper or fee is being deposited with the United States
Postal Service "Express Mail Post Office to Addressee" service under 37 CFR
§1.10 on the date indicated above and is addressed to the Assistant
Commissioner for Patents, ATTN: Box PATENT APPLICATION, Washington,
D.C. 20231.
